

Dynamics AX

– for the construction and contractors industry

The construction and contractors industry is facing a number of challenges and demands when the future work environment, living environment and communication are going to be developed. Sogeti has a special adjusted tool for this industry based on Microsoft Dynamics AX. The system gives you better cost control, simplified administration and higher flexibility in the projects.

Projects get more and more complicated, more partners are involved and the demands on efficiency and profitability increases constantly. Dynamics AX gives possibilities to combine project planning with forecasts and result follow-up. Current information is always accessible when needed, where decisions is being made – in the board room or at the construction place.

Dynamics AX is a business system designed for companies that demands a modern Windows and Web based support system for resource handling and to simplify and harmonize its processes to strengthen the company's ability to react quickly to the constant changes in the surrounding world.

Sogeti works with preconfigured templates for setting-up Dynamics AX and standardized process descriptions for the industry that easily can be recycled and adjusted to decrease time and cost of implementation.
