

SOGETI

IT Services for the Forest Industry

– when you need help to run and manage your IT projects or manage your systems

To have access to an experienced IT partner, with an extensive industry knowledge, secures your operations. Sogeti combines a wide IT expertise with a deep operational knowledge. Our experience is your security.

The Swedish forest industry plays a major part in the global provision of forestry products and is of great importance to the Swedish economy. The forest industry is also one of the major industries in Sweden in regards to sales values, employment and investments.

Sogeti knows its forest industry. Through the years we have developed industry adjusted solutions and supported our clients with expertise regarding applications, customer relations, strategies and a number of other services of great use specifically for the forest industry. Our extensive collaboration with companies and organisations within the business and our both wide and cutting-edge experience of IT solutions within the forest industry can be of great value to you.

Our competence

Sogeti has many years' experience of collaborating with clients working with timber, wood, paper and pulp. This has provided us with a wide competence within these areas of expertise. This involves a large variety of applications, programme languages and environments. Below listed are a few examples of different types of application that we have worked with and are highly experienced in:

1. Area planning systems
2. Timber settlement systems
3. Timber flow and supply systems
4. Timber databases
5. Geographical Information Systems (GIS)
6. Production planning systems
7. Production follow-up systems
8. Machine computers/forest machines
9. Stand registers
10. Inventory mill systems
11. Sawmill systems
